APP AZZURRO - INVERSOR

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

1. Primer paso.

1. Primero se debe comprar si llega la señal de red wi-fi doméstica o particular del cliente al lugar donde está instalado el inversor.
2. Si la señal de red wi-fi está presente en el punto donde está instalado el inversor, se puede iniciar el procedimiento de configuración.
3. En el caso de que la señal wi-fi de la red doméstica no llegue al lugar donde está instalado el inversor, es necesario acercar el router o proporcionar un sistema de terceros que amplifique la señal y la lleve al sitio de instalación.

Una opción de configuración podría ser la siguiente:

1. Buscar las redes inalámbricas para ver la red de la tarjeta wifi del inversor, que será del tipo:

AP_0502173653

El número que se mostrará como el nombre de la red, indica el número de serie de la tarjeta. Se puede verificar mirando la referencia de la etiqueta ubicada en la parte inferior, del lado derecho, del inversor.

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

2. Segundo paso.

Abrir un navegador (En el SmartPhone) y en la barra de búsqueda ingresar la dirección IP 10.10.100.254 para acceder al servidor web interno de la tarjeta wi-fi. Ingresar nombre de usuario y contraseña: **admin (En ambos)**

La pantalla que se muestra a continuación se abrirá a la derecha:

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

3. Tercer paso.

Haga clic en “Wizard” para iniciar la configuración asistida.

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

4. Cuarto paso.

En la siguiente pantalla, marcar Conexión inalámbrica y presionar Siguiente.

The screenshot shows a web-based configuration interface for an Azzurro device. At the top, there is a star icon and the IP address 10.10.100.254. Below this, there are language selection options: 中文 (Chinese) and English. The main content area is titled 'Connection Settings:' and contains two radio button options: 'Wireless connection' (selected) and 'Cable connection'. To the right of these options is a dropdown menu labeled 'Wireless' with 'Enabled' selected. At the bottom of the main area are 'Back' and 'Next' buttons. A progress bar at the very bottom shows seven steps, with step 2 highlighted. The version number 'Ver:1.0.51' is visible at the bottom center.

Help

The STA mode of wireless connection will be turned off by system automatically when you choose cable network connection.

Whether to keep the AP mode of wireless connection or not can be set by turning on or off the wireless function.

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

5. Quinto paso.

De la lista de redes inalámbricas disponibles, marcar la que desea conectar a la tarjeta wifi, luego presionar Siguiente

The screenshot shows the configuration wizard for an Azzurro device, specifically Step 3: "Please select your current wireless network:". The interface is in English, with a language selector at the top right showing "中文" and "English". The top status bar displays the IP address "10.10.100.254" and a star icon. The left sidebar contains navigation options: Status, Wizard (selected), Wireless, Cable, Advanced, Upgrade, Restart, and Reset. The main content area features a "Site Survey" table with columns for SSID, BSSID, RSSI, and Channel. The table lists four networks: AP_806877488, DIRECT-GAINNOCENTI-N8msQG, ZcHotspot, and AndroidAP3533. The "AndroidAP3533" network is selected, indicated by a radio button and a blue dot. Below the table, a note states: "★ Note: When RSSI of the selected WiFi network is lower than 15%, the connection may be unstable, please select other available network or shorten the distance between the device and router." A "Refresh" button is located below the note. Further down, there is a section for "Add wireless network manually:" with input fields for "Network name (SSID) (Note: case sensitive)" (containing "AndroidAP3533"), "Encryption method" (set to "WPA2PSK"), and "Encryption algorithm" (set to "AES"). "Back" and "Next" buttons are positioned below the manual entry fields. At the bottom, a progress bar shows seven steps, with step 3 highlighted in blue. The version number "Ver.1.0.51" is displayed at the very bottom.

SSID	BSSID	RSSI	Channel
AP_806877488	ac:cf:23:1b:ea:74	100%	1
DIRECT-GAINNOCENTI-N8msQG	90:48:9a:94:5a:19	44%	6
ZcHotspot	04:bd:88:09:ad:44	29%	6
AndroidAP3533	2e:0e:3d:7c:29:21	100%	11

★ Note: When RSSI of the selected WiFi network is lower than 15%, the connection may be unstable, please select other available network or shorten the distance between the device and router.

Refresh

Add wireless network manually:

Network name (SSID) (Note: case sensitive): AndroidAP3533

Encryption method: WPA2PSK

Encryption algorithm: AES

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

6. Sexto paso.

Ingresar y repetir la contraseña de red doméstica elegida para la conexión.

The screenshot shows a web-based configuration interface for an Azzurro device. At the top, there is a star icon and the IP address 10.10.100.254. Below this, a navigation menu on the left lists options: Status, Wizard (highlighted), Wireless, Cable, Advanced, Upgrade, Restart, and Reset. The main content area is titled 'Please enter the wireless network password:' and contains two input fields for 'Password (8-64 bytes) (Note: case sensitive)' and 'Re-enter password', with a 'Show Password' checkbox. Below the input fields are 'Back' and 'Next' buttons. At the bottom, a progress bar shows seven steps, with step 4 currently selected. The version number 'Ver:1.0.51' is displayed at the very bottom.

Nota: El sistema verificará que la contraseña ingresada sea en realidad la de la red doméstica, si se ingresó una contraseña incorrecta, se mostrará un mensaje de error y saldrá el aviso que debe ingresarse nuevamente la contraseña, asegurarse que la contraseña sea realmente utilizada para conexión a la red doméstica.

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

7. Séptimo paso.

Seleccionar “Enable” para obtener automáticamente la dirección IP del enrutador, luego haga clic en Siguiente.

The screenshot shows the configuration wizard for an Azzurro device, specifically the network configuration step (Step 5). The interface is in English, with a language selector at the top right showing "中文" and "English". The top bar displays the IP address "10.10.100.254" and a refresh button. The left sidebar contains navigation options: Status, Wizard (selected), Wireless, Cable, Advanced, Upgrade, Restart, and Reset. The main content area is titled "Please fill in the following information:" and contains the following fields:

- "Obtain an IP address automatically" with a dropdown menu set to "Enable".
- "IP address" with a text input field containing "0.0.0.0".
- "Subnet mask" with a text input field containing "0.0.0.0".
- "Gateway address" with a text input field containing "0.0.0.0".
- "DNS server address" with an empty text input field.

At the bottom of the main content area, there are "Back" and "Next" buttons. Below these buttons is a progress bar with seven steps, where step 5 is currently selected. The bottom of the screen shows the version "Ver:1.0.51".

COMO CONFIGURAR UN EQUIPO AZZURRO A UN SMARTPHONE

8. Octavo paso.

Sin hacer ningún cambio, hacer clic en Siguiente.

The screenshot shows a web-based configuration interface for an Azzurro device. At the top, there is a status bar with a star icon, the IP address 10.10.100.254, a refresh icon, and a menu icon. Below this, there are language options: 中文 and English. The main content area is divided into three sections. On the left is a sidebar menu with options: Status, Wizard (highlighted), Wireless, Cable, Advanced, Upgrade, Restart, and Reset. The central section is titled 'Enhance Security' and contains the text: 'You can enhance your system security by choosing the following methods'. Below this text are three options, each with a checkbox: 'Hide AP', 'Change the encryption mode for AP', and 'Change the user name and password for Web server'. At the bottom of this section are 'Back' and 'Next' buttons. Below the buttons is a progress bar with seven steps, where step 6 is currently selected. The right section is titled 'Help' and contains three paragraphs of text explaining the security options. At the bottom of the page, the version number 'Ver:1.0.51' is displayed.

Help

Hide AP
The SSID of the AP network will be invisible if you hide the AP. Please enter the SSID manually when you need to connect to AP next time.

Change the encryption mode for AP
If you set password for the AP network, you will need to enter the password to connect to AP.

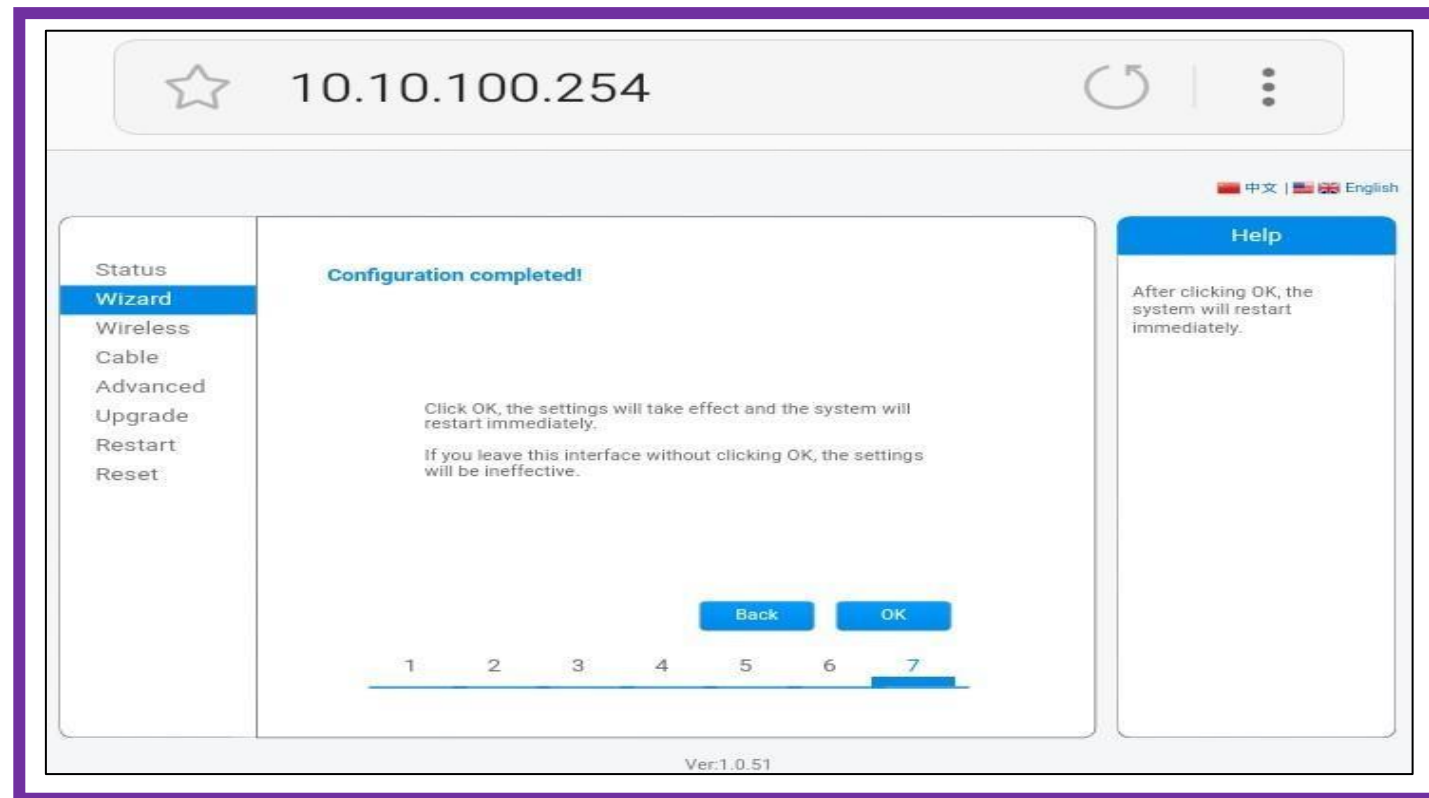

Change the user name and password for Web server
If you change the username and password for the web server, you will need to enter the new username and password to get access to the setting page.
